

Department of Defense

Report on 2005 Defense Base Closure and Realignment Implementation

September 2011

**Office of the Deputy Under Secretary of
Defense (Installations and Environment)**

Preparation of this report/study cost the
Department of Defense a total of approximately
\$201,380 for the 2011 Fiscal Year.

Report Documentation Page				Form Approved OMB No. 0704-0188	
Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

Appendix 2: Additional (Non-DERP) Environmental Remediation Issues

Appendix 3: Section 2907, BRAC Act of 1990

Introduction

The National Defense Authorization Act for Fiscal Year 2002 amended the Defense Base Closure and Realignment Act of 1990 (Public Law 101-510) to authorize a round of closures and realignments in 2005. The Commission forwarded its report and recommendations to the President on September 8, 2005. On September 15, 2005, the President approved the Commission's recommendations and forwarded its report to Congress. Since Congress did not enact a joint resolution of disapproval within the review period provided by the BRAC Act, on November 9, 2005, the Department became legally obligated to close and realign all installations recommended for closure and realignment in the Commission's report. In accordance with the BRAC Act, the Department is completing actions to implement the recommendations.

This report addresses reporting requirements specified in Section 2907 of the BRAC Act, as amended by Section 2831 of the National Defense Authorization Act for Fiscal Year 2006 (P.L. 109-163) and Section 2711 of the National Defense Authorization Act for Fiscal Year 2009 (P.L. 110-417).

As was the case in prior BRAC rounds, the Fiscal Year 2012 budget justification material submitted separately by the Comptroller was developed to satisfy the requirements of paragraphs (1) and (2) of Section 2907 of the BRAC Act. The DoD Component justification material provided detailed information by realignment and closure package, broken out by one-time implementation costs, anticipated revenues from land sales, and expected savings.

Section 2831 of the National Defense Authorization Act for Fiscal Year 2006 amended section 2907 by adding new reporting requirements. The amended section 2907 is provided in Appendix 3. This report provides the information required by paragraphs three through seven. Specifically, this report provides:

- a description of the closure actions already carried out at each BRAC 2005 installation and the current status of the closure of the installation, including whether—
 - a redevelopment authority has been recognized by the Secretary of Defense for the installation;
 - the screening of property at the installation for other Federal use has been completed; and
 - a redevelopment plan has been agreed to by the redevelopment authority for the installation;
- a description of redevelopment plans for each BRAC 2005 installation;
- the quantity of property remaining to be disposed of at each BRAC 2005 installation as part of its closure;
- the quantity of property already disposed of at each BRAC 2005 installation;

- a list of the Federal agencies that have requested property during the screening process for each BRAC 2005 installation, including the date of transfer or anticipated transfer of the property to such agencies, the acreage involved in such transfers, and an explanation for any delays in such transfers;
- a list of known environmental remediation issues at each BRAC 2005 installation, including the acreage affected by these issues, an estimate of the cost to complete such environmental remediation, and the plans (and timelines) to address such environmental remediation; and
- an estimate of the date for the completion of all closure actions at each BRAC 2005 installation.

BRAC 2005 affects hundreds of locations across the Nation through 24 major closures, 24 major realignments, and 765 lesser actions. The large number of transformational recommendations, particularly recommendations to establish joint operations, present significant implementation challenges. To meet these challenges, the Department developed Business Plans that laid out the requisite actions, timing of those actions, and the costs and savings associated with implementing each recommendation. Completing implementation of these plans has been the primary activity over the past year.

In addition, the Department has completed screening for property transfer to other federal agencies, recognized Local Redevelopment Authorities, and worked with communities impacted by both closure and growth. Most data reported for each installation data contained in this report is as of December 1, 2010. Environmental remediation cost to complete data is consistent with the FY12 budget submission to Congress.

Report Organization

Installations impacted by BRAC 2005 recommendations (including leased installations) are provided by Military Department by state, and Defense Agency. For each closing installation the report provides individual installations summaries consisting of:

- The BRAC Commission number and title for all recommendations affecting the installation.
- A top level description of the closure actions completed.
- Whether a local redevelopment authority (LRA) has been recognized by the Secretary of Defense. A LRA may be recognized to prepare a redevelopment plan when there is surplus property to be disposed (32 CFR Part 174).
- Whether the screening of property at the installation for other Federal Agency use has been completed.

- Whether a redevelopment plan has been agreed to by the redevelopment authority. The deadline for submittal of a redevelopment plan by a LRA may be extended through the Director of the Office of Economic Adjustment (32 CFR Part 176).
- If a redevelopment plan does exist, its description. For this section there are three types of descriptions:
 - A description of the redevelopment plan.
 - No Surplus Property. This indicates that because there is no surplus property available for disposal, no redevelopment plan is necessary. This response also includes installations that have property excess to DoD, but the property is slated for transfer to another federal agency, and is therefore, unavailable to the community. In addition, this description applies to leased locations and other types of property arrangements where the property is not owned by DoD and as such cannot be transferred by DoD.
 - Pending. The plan has not been finalized and, therefore, a description cannot be provided.
- The total quantity of property remaining to be disposed. This section reflects the Government Owned acreage reported by the Military Departments that has been screened through a formal "Notice of Availability" under the General Services Administration-delegated disposal authorities across the components of the Department of Defense and determined as "excess" to the Department's needs. This data reflects what was reported by the Military Departments as of September 30, 2010. Where the "excess" determination has not been finalized, the acreage published in the component's "Notice of Availability" as of date of the publication of report is represented.
- The quantity of property already disposed. This will be shown as "none" for most installations.
- A list of the Federal Agency(s) that have requested property during the screening process, including the date of anticipated transfer, the acreage involved, and an explanation of any delays to transfer. Federal Agency(s) have expressed a request for property by either a Notice of Intent or a GSA Form 1334/DD 1354 application. A Notice of Intent request is not a binding agreement and subsequent reports will reflect only GSA Form 1334/DD 1354 application requests.
- The overall estimated completion date for all closure actions at the installation. This is the last date of the last action necessary to complete the closure. This equates to the date on which all functions have transferred from the installation and activities cease except for caretaker actions. It does not include time necessary for environmental restoration or property disposal. Note: the Department's Business Plans track implementation at the recommendation level which often affects more than one installation. The plans contain an overall completion date. This date is the projected point in time in which all actions (e.g. personnel performing a function are moved, construction at receiving installations) in the Business Plan are completed.

- If an installation has environmental remediation issues, those are detailed at Appendices 1 and 2.

Environmental Remediation Issues and Cost to Complete

Appendix 1 provides the list of known environmental remediation issues at each installation closed by BRAC 2005 that are part of the Defense Environmental Restoration Program (DERP) as defined by DoD's *2001 Management Guidance for the DERP*. The data presented for each installation includes the known environmental remediation issues to be addressed under the DERP, an estimate of the cost to complete for DERP eligible environmental restoration activities, the number of acres affected by remediation issues, the plans and timelines for addressing these remediation issues, the affected media, remedy types, and contaminant types identified for prioritization ranking purposes

Below is a Department-level summary of the estimated cost to complete for all known environmental remediation actions for the DERP sites at installations impacted by the 2005 BRAC round.

BRAC Category	Cost-to-Complete (\$ Millions)
BRAC Round 2005	\$414.5

The DERP cost-to-complete for closing installations is funded through the BRAC account. Cost-to-complete estimates are based on the best-available information at the time of their development and represent bottom-up, site level aggregations. Additionally, the cost-to-complete estimates address all site-level DERP requirements at the entire installation.

Appendix 2 provides the list of known environmental remediation issues at each affected installation affected by the BRAC 2005 actions that are not included in the DERP, as defined by the *DERP Management Guidance*. For each issue Appendix 2 includes the type of remediation issue; its description; acreage affected; an estimate of the cost to complete; a description of the plans to address each issue; and timelines for addressing each remediation issue in terms of estimated start and completion dates. The types of "non-DERP" environmental remediation issues are categorized as follows:

- Operational Ranges
- Asbestos
- Landfill Closure
- Tank Closure
- Building Decontamination (DECON)
- Radiological Decontamination
- Permits to Site Closeouts
- Notice of Violation

- Other

Definitions for each of these categories are located in Appendix 2.

Army

Alabama

Abbott USARC, Tuskegee, AL

Commission recommendation(s) affected by this installation:

Number	Title
11	RC Transformation in Alabama

Closure or realignment actions taken as of December 1, 2010:

Conducted BRAC Implementation Planning. Conducted site orientation visit. Developed and submitted Business Plan to facilitate budget allocation. Business Plan has been approved. ECP is complete. Army Conveyance Team has met to start transfer actions.

Has a local redevelopment authority been recognized by the Secretary of Defense? Yes

Has the screening of property for other Federal Agency use been completed?
Yes

Has a redevelopment plan been agreed to by the redevelopment authority? Yes

Description of redevelopment plan:
Complete Recreation

Quantity of property remaining to be disposed: 5.69

Quantity of property already disposed: 0.0

Federal Agencies requesting property during screening process; and if applicable, the anticipated transfer date and the amount of property to be transferred:

Federal Agency	Anticipated Transfer Date	Acres to be Transferred
None	None None

Disposal NEPA underway. ECP underway. Reuse Plan has been approved. Installation closed 31 March 2010. Lease signed with LRA 1 April 2010. Follow-on action for clearance and relocation to Rock Island Arsenal of Armys metal parts mission contractor complete 30 September 2010. Actions for clearance of personal property via MOA and bill of sale in progress. Environmental clean-up activities include ground water, PCBs from decrepitation of galbestos sliding and roofing, removal of equipment and storm water run-off from waste water treatment plant. Real property estimates complete and parcels have been offered for sale. Transfer of operating permits for facility utilities partially complete; will conclude when property completes transfer.

Has a local redevelopment authority been recognized by the Secretary of Defense? Yes

Has the screening of property for other Federal Agency use been completed?
Yes

Has a redevelopment plan been agreed to by the redevelopment authority? Yes

Description of redevelopment plan:

Mixed use, primarily light industrial and business park, with a focus on "green" industry and retention of existing ARMS tenants.

Quantity of property remaining to be disposed: 172.0

Quantity of property already disposed: 0.0

Federal Agencies requesting property during screening process; and if applicable, the anticipated transfer date and the amount of property to be transferred:

Federal Agency	Anticipated Transfer Date	Acres to be Transferred
None	None None	

Explanation for any delays in transfer of property:

None

District of Columbia

Walter Reed Medical Center, DC

Commission recommendation(s) affected by this installation:

Number	Title
169	Walter Reed National Military Medical Center, Bethesda, MD

Closure or realignment actions taken as of December 1, 2010:

Attended Walter Reed Garrison BRAC Implementation Planning Conferences. Completed multiple site visits and detailed planning sessions to review Main Post closure actions, MILCON design reviews and unit relocations to Ft Belvoir, Ft Detrick, Ft Sam Houston, Forest Glen Annex, Dover AFB, Aberdeen Proving Ground, and Bethesda, MD. Developed and submitted updated Business Plan to facilitate budget allocation. Business Plan update is under review and in coordination with other services and OSD Basing. General Services Administration has rescinded its request for 34 acres. The Department of State is accepting the entire 52 acres identified for Fed to Fed transfer. Disposal NEPA is underway. ECP was completed 18 December 2006. CERFA was signed 5 February 2007. Original REC is being replaced with and EA due to a partial transfer out of Federal control via the Local Reuse Authority process. Significant environmental action includes decommissioning of NRC license. Reuse planning efforts with Local Reuse Authority and State Dept property recipients continue. LRA has been granted an extension for Reuse Plan submission until 5 March 2011. Section 106 consultation with State Historic Preservation Office is ongoing. Command and control of Forest Glen Annex transferred from WRAMC to Fort Detrick on 1 October 2008. Conducted Project Review Board to determine prioritization of military projects. BRAC construction at WRNMMC (Bethesda) and Ft Belvoir hospitals are progressing on schedule. MILCON contracts continue to be awarded on time and are on schedule. Most recent contracts awarded have been for Armed Forces Medical Examiner at Dover, and Medical museum at Forest Glen. The LRA requested more time to complete their reuse plan per BRAC law. OEA recommended the LRA, Department of State and the Department of the Army reach an agreement on the revised boundaries prior to submitting official extension request.

Has a local redevelopment authority been recognized by the Secretary of Defense? Yes

Has the screening of property for other Federal Agency use been completed?
Yes

Has a redevelopment plan been agreed to by the redevelopment authority? No

Description of redevelopment plan:

On 8/7/09, the Department of State released its interest in 62.5 acres, making it available to the LRA for redevelopment. The LRA immediately began its base redevelopment planning efforts.

Quantity of property remaining to be disposed: 113.0

Quantity of property already disposed: 0.0

Ft Gillem, GA

Commission recommendation(s) affected by this installation:

Number	Title
2	Fort Gillem, Georgia
62	Naval Air Station Atlanta, GA

Closure or realignment actions taken as of December 1, 2010:

Conducted BRAC Implementation Planning, site orientation visit and synchronization meetings. Developed and submitted Business Plan to facilitate budget allocation which has been approved by OSD. Closure NEPA completed March 2008. Environmental Condition of Property (ECP) completed. Consultation with State Historic Preservation Office (SHPO) on historic property Programmatic Agreement is complete. BRAC MILCON at gaining installations is planned and underway: First Army HQ renovation completion date at Rock Island Arsenal is April 2011. 2nd Recruiting Brigade construction and move to Redstone Arsenal was completed in April 2009. 52d EOD Group personnel relocated to Fort Campbell into interim space in July 2009; new MILCON at Fort Campbell will be completed June 2011. 81st RRC Equipment Concentration Site (ECS) at Fort Benning has estimated construction completion date of June 2011. MILCON for 3rd CID at Hunter Army Airfield (discretionary move) is scheduled for construction completion in June 2011. The closing of the AAFES Atlanta Distribution Center (ADC) is in progress, with expected completion date of January 2011. The contiguous Gillem enclave will be established as a sub-installation of Fort Gordon by July 2011. The three MILCON projects for the enclave are in progress. The Communication Network Facility was completed in August 2010. The renovation of a facility for the Georgia Army National Guard will be complete in August 2011. The Force Protection project for the enclave will be complete in March 2011. No Fed to Fed transfers are planned since FEMA has withdrawn an earlier request for real property.

Has a local redevelopment authority been recognized by the Secretary of Defense? Yes

Has the screening of property for other Federal Agency use been completed?
Yes

Has a redevelopment plan been agreed to by the redevelopment authority? Yes

Description of redevelopment plan:

Mixed use residential, commercial, light industrial, institutional use and a business park. The LRA has decided to request a Fair Market Value EDC for 722 acres.

Ft Monmouth, NJ

Commission recommendation(s) affected by this installation:

Number	Title
5	Fort Monmouth, New Jersey

Closure or realignment actions taken as of December 1, 2010:

Army conducted BRAC Implementation Planning. Completed site orientation visits and conducted project review boards to determine prioritization of military projects. FMNJ ECP site investigation completed September 2008. FMNJ disposal NEPA completed with FNSI signed February 2010. Initial personnel movement to Aberdeen Proving Ground occurred in November 2007. Army completed construction on the Phase 1 C4ISR facilities and expects completion of the Phase 2 C4ISR facilities by 3rd Qtr FY11. Advance moves include over 2,500 positions from Ft Monmouth to Aberdeen Proving Ground through September 2010. Ft Belvoir facilities received 185 of 466 PEO EIS positions by September 2010. West Point USMAPS construction underway and relocation of USMAPS mission will occur in May 2011 from Fort Monmouth with completion of barracks and dining facilities at West Point. Prepared Naval Base Point Loma site and moved the Joint Program Executive Office - Joint Tactical Radio System (JPEO JTRS) from Fort Monmouth, NJ, to Naval Base Point Loma (Fleet ASW Training Center), San Diego, CA. Report to Congress addressing concerns that Ft Monmouth closure and resulting relocations would disrupt critical operations submitted 28 December 2007. Consolidated PM Acquisition, Logistics and Technology Enterprise Systems and Services (ALTESS) facility at 2511 Jefferson Davis Hwy, Arlington, VA in January 2009 (20 positions).

Has a local redevelopment authority been recognized by the Secretary of Defense? Yes

Has the screening of property for other Federal Agency use been completed?
Yes

Has a redevelopment plan been agreed to by the redevelopment authority? Yes

Description of redevelopment plan:

The redevelopment plan was submitted to HUD in September 2008 and awaits HUD's response. Overall plan incorporates three separate plans, one for Tinton Falls, Eatontown and Oceanport.

Virginia

Ft Monroe, VA

Commission recommendation(s) affected by this installation:

Number	Title
8	Fort Monroe, Virginia

Closure or realignment actions taken as of December 1, 2010:

Conducted BRAC Implementation Planning. Developed and submitted Business Plan to facilitate budget allocation. Business Plan has been approved. Conducted site orientation visits and BRAC planning conferences. Fed to Fed transfer of Bethel Reservoir completed July 2006 (for 499 Acres). The Reuse Plan for Fort Monroe (564.5 acres) was submitted by Fort Monroe Federal Area Development Authority and approved by the Governor, Commonwealth of Virginia (COV). The Reuse Homeless Accommodation Sufficiency Review was submitted to HUD and approved July 2010. Disposal and NEPA actions are progressing on schedule, the Army advanced from an EA (Environmental Assessment) to Environmental Impact Statement (EIS) process to accommodate the Reuse plan. The Final EIS and Record of Decision were completed August 2010. The Army team continued to sponsor monthly Environmental Clean Up coordination meetings with Virginia Department of Environmental Quality throughout 2010. The Army awarded a contract to perform Environmental and Munitions Explosives of Concern (MEC) Remedial Investigations (RI). RI work started October 2008 and provided base wide investigations throughout FY09 and FY10 to achieve Environmental and Munitions actions required for BRAC closure. Army sponsored quarterly Restoration Advisory Board (RAB) community meetings to promote public awareness of BRAC Environmental and MEC actions throughout 2008, 2009 and 2010. The Fort Monroe Programmatic Agreement was completed 6 May 2009, achieving consultation and compliance with the National Historic Preservation Act, Section 106 requirements. PA public meetings were held in Hampton, Richmond, VA and Washington DC. The PA was approved by the Governor of Virginia and all signatory parties. All supporting MILCON construction necessary to receive realigning units moving from Fort Monroe is underway and proceeding on schedule at Fort Knox, KY and Fort Eustis, VA (2 construction project were awarded FY09, and 5 construction projects were award in FY10, with all projects on schedule). Fort Monroe closure property disposal planning with the Commonwealth of Virginia was initiated May 2010 and continued throughout 2010. Projected Fort Monroe closure property disposal is an Economic Development Conveyance (EDC) with the Commonwealth of Virginia, Fort Monroe Development Authority (FMA). In 2010 all BRAC actions continued to progress on schedule, supporting Fort Monroe closure by 14 September 2011.

Has a local redevelopment authority been recognized by the Secretary of Defense? Yes

170	Brooks City-Base, TX

Closure or realignment actions taken as of December 1, 2010:

The Air Force is proceeding with planning actions to close Brooks City-Base, TX and relocate tenants to gaining locations as directed in BRAC Law, i.e., Randolph AFB, TX, Wright Patterson AFB, OH, Lackland AFB, TX, Ft Sam Houston, TX, and Aberdeen Proving Grounds, MD. Remaining construction projects previously reported are underway and on schedule for completion 3QTR FY2011. Remaining actions are ongoing, i.e., refine, validate and finalize requirements such as: equipment/furnishings, communications, information technology, and infrastructure requirements; removal/transportation of things from lease space (equipment/furnishings); and identify remaining fiscal requirements and closeout procedures. Brooks City-Base personal property transfer agreement with LRA signed October 1, 2008 and implementation is underway. Lease termination planning ongoing, i.e., obtain MOA signature, update ECP, develop access agreement for post lease termination access to clean up any environmental issues.

Has a local redevelopment authority been recognized by the Secretary of Defense? Yes

Has the screening of property for other Federal Agency use been completed?

No property to transfer

Has a redevelopment plan been agreed to by the redevelopment authority? No

Description of redevelopment plan:

None

Quantity of property remaining to be disposed: 0.0

Quantity of property already disposed: 0.0

Federal Agencies requesting property during screening process; and if applicable, the anticipated transfer date and the amount of property to be transferred:

Federal Agency	Anticipated Transfer Date	Acres to be Transferred
None	None None	

Explanation for any delays in transfer of property:

Known environmental remediation issues: See Appendix 1

Acreage affected by remediation issues: See Appendix 1

Estimated cost to complete environmental remediation: See Appendix 1

Plans and timelines to address environmental remediation: See Appendix 1

Estimated completion date for all closure or realignment actions: Sep 15 2011

Virginia

1501 Wilson Boulevard, Arlington - Air Force, VA

Commission recommendation(s) affected by this installation:

Number	Title
129	Co-locate Miscellaneous Air Force Leased Locations and National Guard Headquarters Leased Locations

Closure or realignment actions taken as of December 1, 2010:

Washington Headquarters Service is responsible for facility closure actions at this location. The Air Force continues to validate requirements and realignment actions to relocate Air Force personnel from this leased facility to Andrews AFB, MD as directed in BRAC 2005 law. Military construction beneficial occupancy date is February 2011. Personnel moves from leased locations expected to begin in late March or early April 2011. The Air Force continues to refine, validate and finalize requirements for the new facility such as: equipment/furnishings, communications, information technology, and infrastructure requirements; removal/transportation of things from lease space (equipment/furnishings) to Andrews AFB; and identify remaining fiscal requirements and closeout procedures.

Defense Finance and Accounting Service (DFAS)

DFAS - Oakland, CA

Commission recommendation(s) affected by this installation:

Number	Title
145	Defense Finance and Accounting Service

Closure or realignment actions taken as of December 1, 2010:

An initial site survey visit was conducted in November 2005. The purpose of the survey was to develop a site profile for DFAS locations. The visit consisted of data collection for business processes, workforce size, and systems applications. This information will be used for workload and workforce transition to the enduring sites. DFAS planned for site closure and mission realignment. DFAS conducted an All Hands briefing in December 2005 to inform employees about the BRAC closure schedule, impacts to employees, and upcoming events. Union officials for sites closing in FY06 were notified in December 2005. Voluntary Early Retirement Act (VERA) / Voluntary Separation Incentive Program (VSIP) windows and employee registration in the Priority Placement Program (PPP) were scheduled for February 2006. Human Resources scheduled Reduction in Force (RIF) notices to be issued in March 2006. DFAS, Oakland closed in June 2006.

Has a local redevelopment authority been recognized by the Secretary of Defense? No

Has the screening of property for other Federal Agency use been completed?

No property to transfer

DFAS - Rock Island Arsenal, IL

Commission recommendation(s) affected by this installation:

Number	Title
145	Defense Finance and Accounting Service

Closure or realignment actions taken as of December 1, 2010:

DFAS continued planning for site closure and mission realignment. DFAS conducted an All Hands briefing in December 2005 to inform employees about the BRAC closure schedule, impacts to employees, and upcoming events. Human Resources surveyed employees to identify those who are willing to relocate to enduring sites. An initial site assessment was conducted in December 2005. The assessment included the collection of data for facilities, business processes, workforce size, and systems applications. This information will be used for planning workload migration to the enduring sites. DFAS, Rock Island Arsenal closed in June 2008.

Has a local redevelopment authority been recognized by the Secretary of Defense? No

Has the screening of property for other Federal Agency use been completed?

No property to transfer

Has a redevelopment plan been agreed to by the redevelopment authority? No

Description of redevelopment plan:

None

Quantity of property remaining to be disposed: 0.0

Quantity of property already disposed: 0.0

Federal Agencies requesting property during screening process; and if applicable, the anticipated transfer date and the amount of property to be transferred:

Federal Agency	Anticipated Transfer Date	Acres to be Transferred
None	None None	

Explanation for any delays in transfer of property:

None.

Known environmental remediation issues: None

Acreage affected by remediation issues: None

Estimated cost to complete environmental remediation: None

Commission recommendation(s) affected by this installation:

Number	Title
145	Defense Finance and Accounting Service

Closure or realignment actions taken as of December 1, 2010:

An initial site survey visit was conducted in November 2005. The purpose of the survey was to develop a site profile for DFAS locations. The visit consisted of data collection for business processes, workforce size, and systems applications. This information will be used for workload and workforce transition to the enduring sites. DFAS planned for site closure and mission realignment. DFAS conducted an All Hands briefing in December 2005 to inform employees about the BRAC closure schedule, impacts to employees, and upcoming events. Union officials for sites closing in FY06 were notified in December 2005. Voluntary Early Retirement Act (VERA) / Voluntary Separation Incentive Program (VSIP) windows and employee registration in the Priority Placement Program (PPP) were scheduled for February 2006. Human Resources scheduled Reduction in Force (RIF) notices to be issued in March 2006. DFAS, San Antonio closed in August 2006.

Missile Defense Agency (MDA)

Suffolk Building, Falls Church - MDA, VA

Commission recommendation(s) affected by this installation:

Number	Title
134	Co-locate Missile and Space Defense Agencies

Closure or realignment actions taken as of December 1, 2010:

In response to the 2005 Defense Base Realignment and Closure (BRAC) Commission recommendations, MDA was directed to realign several MDA functions currently being conducted in the National Capital Region (NCR) to other Government facilities. The Headquarters functions currently in FOB2 and the Suffolk Building slated to remain in the NCR will be consolidated in a Headquarters Command Center (HQCC) located at Fort Belvoir, VA, while the other mission and mission support activities will be relocated to the Von Braun (VB) complex on Redstone Arsenal in Huntsville, AL. Design-build contracts have been awarded for both of the BRAC-directed construction projects. A \$38.5 million HQCC contract was awarded to Foulger-Pratt Construction of Rockville, MD. A \$221 million contract was awarded to Archer Western Contractors of Atlanta to design and build the third and largest phase of the Von Braun complex on Redstone Arsenal. When complete in 2011, the new facility will be the largest building on Redstone Arsenal and able to accommodate approximately 2,650 occupants. Construction on the HQCC is approximately 81% complete, and the VBIII facility is about 85% complete. As these efforts are underway, MDA continues to realign functions performed in the NCR to facilities in Huntsville. To date, MDA has transitioned or established more than 2,000 of the planned 2,248 BRAC positions to Huntsville/Redstone Arsenal. To accommodate these early realignments, MDA leveraged the recently completed Von Braun II facility and other office space available in Huntsville and on Redstone Arsenal. The remainder of our BRAC positions going to Redstone Arsenal will realign before the September 15, 2011 deadline.

Has a local redevelopment authority been recognized by the Secretary of Defense? No

Number	Title
133	Co-locate Miscellaneous DoD, Defense Agency, and Field Activity Leased locations

Closure or realignment actions taken as of December 1, 2010:

Component	Description	Complete Date
WHS	The Department of the Army signed a contract on 25 November 2008 with Duke Realty to construct an Administrative Complex for 6,409 personnel relocating with elements of OSD and WHS organizations, Defense Agencies and Field Activities under BRAC #133 at the Mark Center in Alexandria, VA. This location was selected by the Department of the Army for the BRAC #133 site through a formal site selection process. The Department of the Army completed purchase of the land on December 4, 2008. Site preparation and construction began on December 23, 2008. The complex will contain more than 1.7 million gross square feet of office space, including two multi story office towers, parking garages, separate delivery and inspection facilities, and a transportation center. The design build/build-to-suit project, now 100% designed and 86% construction complete is on schedule. The project is being designed to the "LEED Gold" standard.	See Below

Number	Title
133	Co-locate Miscellaneous DoD, Defense Agency, and Field Activity Leased locations

Closure or realignment actions taken as of December 1, 2010:

Component	Description	Complete Date
WHS	The Department of the Army signed a contract on 25 November 2008 with Duke Realty to construct an Administrative Complex for 6,409 personnel relocating with elements of OSD and WHS organizations, Defense Agencies and Field Activities under BRAC #133 at the Mark Center in Alexandria, VA. This location was selected by the Department of the Army for the BRAC #133 site through a formal site selection process. The Department of the Army completed purchase of the land on December 4, 2008. Site preparation and construction began on December 23, 2008. The complex will contain more than 1.7 million gross square feet of office space, including two multi story office towers, parking garages, separate delivery and inspection facilities, and a transportation center. The design build/build-to-suit project, now 100% designed and 86% construction complete is on schedule. The project is being designed to the "LEED Gold" standard.	See Below

Has a local redevelopment authority been recognized by the Secretary of Defense? No

Has the screening of property for other Federal Agency use been completed?

No property to transfer

Has a redevelopment plan been agreed to by the redevelopment authority? No

Description of redevelopment plan:

None

Quantity of property remaining to be disposed: 0.0

Quantity of property already disposed: 0.0

Federal Agencies requesting property during screening process; and if applicable, the anticipated transfer date and the amount of property to be transferred:

Federal Agency	Anticipated Transfer Date	Acres to be Transferred
None	None None	

Explanation for any delays in transfer of property: None

Known environmental remediation issues: None

Acreage affected by remediation issues: None

Estimated cost to complete environmental remediation: None

Plans and timelines to address environmental remediation: None

Estimated completion date for all closure or realignment actions:

Mark Center Project is 87% complete; beneficial occupation date remains 13 Sep 11. Building occupation begins 9 Aug 11 with 16 of 22 organizations fully moved-in and leadership elements in place for 6 remaining organizations by 15 Sep 11.

Department of Defense

Report on 2005 Defense Base Closure and Realignment Implementation

Volume II

September 2011

**Office of the Deputy Under Secretary of
Defense (Installations and Environment)**

Appendix I

Defense Environmental Restoration Program (DERP) Issues

Defense Environmental Restoration Program (DERP) Issues

The Department of Defense (DoD) manages approximately 29 million acres of land, as well as thousands of military facilities and former defense properties throughout the United States and abroad to support its national security mission. This built and natural infrastructure provides DoD with the capability to organize, train, and equip the nation's military to perform its mission. In cooperation with communities and regulators, DoD's environmental programs sustain, restore, and modernize its infrastructure to maintain readiness and protect human health and the environment.

Through the Defense Environmental Restoration Program (DERP), DoD addresses environmental contamination resulting from military activities. The DERP applies the environmental restoration process to all contaminated sites as set forth by the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and its implementing regulation, the National Oil and Hazardous Substances Pollution Contingency Plan. CERCLA is the primary legal authority governing cleanup activities at all DoD installations and properties, including base realignment and closure (BRAC) installations. The DERP has three program categories to address environmental restoration at active and BRAC installations, and Formerly Used Defense Sites (FUDS) properties:

- **The Installation Restoration Program (IRP)** addresses the release of hazardous substances, pollutants, or contaminants on DoD installations and properties.
- **The Military Munitions Response Program (MMRP)** addresses environmental health and safety hazards from unexploded ordnance, discarded military munitions, and munitions constituents at locations other than operational ranges.
- **The Building Demolition/Debris Removal (BD/DR) Program** provides for the demolition and removal of unsafe buildings and structures at facilities or sites that meet specified criteria. Due to the small size of the program, BD/DR sites are included in IRP site counts. The BD/DR program will not be discussed separately from the IRP in this report.

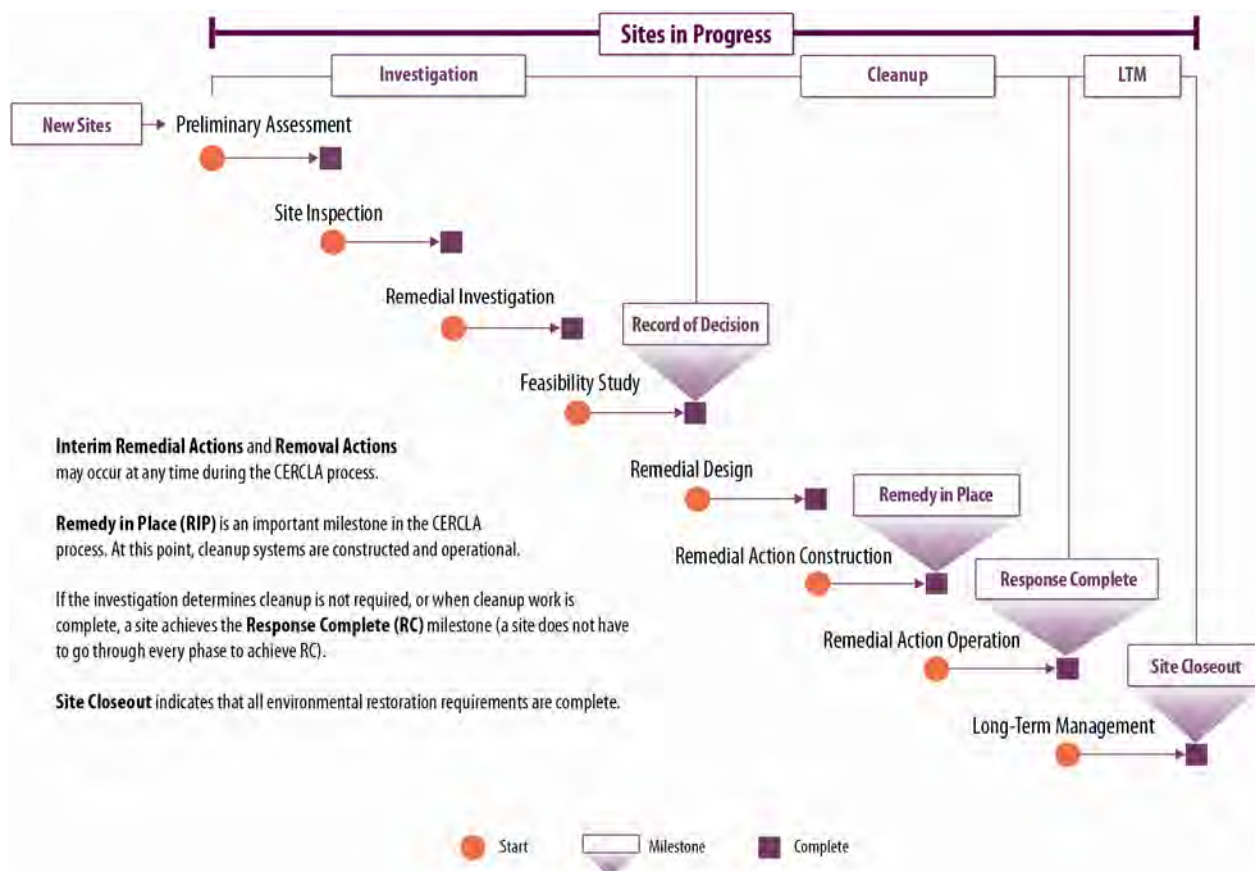

Enactment of Public Law No. 110-417, the "Duncan Hunter National Defense Authorization Act for Fiscal Year 2010," has led to changes in the 2908 reporting requirements. Beginning with fiscal year (FY) 2009, DoD must only report BRAC 2005 closures. Prior to FY2009, both closures and realignments were reported.

Environmental Restoration Process

DoD addresses contamination at BRAC installations within the DERP in the same manner that it addresses contamination at active installations and FUDS properties. DoD monitors cleanup progress at sites by aligning cleanup status with three key stages in the CERCLA process: (1) investigation completed, underway, or planned, (2) cleanup completed, underway, or planned, and (3) long-term management (LTM) completed, underway, or planned. This process is shown in Figure 1.

Defense Environmental Restoration Program (DERP) Issues

Figure 1: Environmental Restoration Process

1. Investigation Completed, Underway, or Planned – When environmental contamination is suspected at a site, DoD begins the investigation process. DoD collects data to assess the nature and extent of contamination and the potential risks posed by the contamination through cleanup phases. These phases include the preliminary assessment (PA), site inspection (SI), and remedial investigation (RI). Using the investigation data, DoD then conducts a feasibility study (FS) to examine the merits of various cleanup options and to determine the best strategy for remediation. The completion milestone for the investigation phase is documented in a Record of Decision (ROD) or an equivalent decision document for the site. In this document, DoD records the results of its investigation, the need for site remediation (if required), the selected remediation strategy, and the remedial objectives for the site. Interim remedial actions (IRAs) are interim removal or remedial actions undertaken prior to the selection of the final remedy as a part of the larger remedy.
2. Cleanup Completed, Underway, or Planned – If investigation results indicate that remediation is required, a site progresses to the cleanup stage, and DoD begins to implement the selected remedy for the site. The cleanup phases comprise the remedial design (RD) and remedial action construction (RA-C), and may include remedial action operation (RA-O). DoD continues cleanup or arranges for the operation of the remedy until the remedial objectives for the site required under the ROD, or equivalent document, are met. Two key milestones included in this stage are:

Defense Environmental Restoration Program (DERP) Issues

- a. Remedy in Place (RIP) – RIP is a milestone within the cleanup phase which indicates that cleanup systems required by the ROD are constructed and operational.
 - b. Response Complete (RC) – A site achieves RC when the site has reached the agreed upon cleanup standards. This stage marks the end of the cleanup process at the site.
3. Long-term Management completed, underway, or planned – After a site achieves RC, it may still require LTM activities to ensure the implemented remedy remains protective of human health and the environment.

Installation Data Template

This appendix provides information for all the BRAC 2005 closing installations in DoD's DERP program with ongoing environmental activities. Data in this appendix are provided at the installation level for reporting purposes. Figure 2 depicts the data template for each installation.

Installation Data Template Sections

A *Installation Identification Information*

Installation Name:	Fort Monmouth	Military Service:	Army
Installation FFID:	NJ221382059700	State:	New Jersey

Lists the installation name, a unique identifier referred to as the federal facility identification (FFID) number, the Military Service, and state.

This graphic depicts the introductory information for each installation. The template provides the installation's name, the state where it is located, the responsible Military Service, and its FFID. The FFID is unique to the installation and its accompanying data to enable thorough tracking of information from year to year.

B *Total Sites and Acreage*

	Sites	Sites RC
Total:	56	44
IRP:	55	43
MMRP:	1	1

Affected Acres:	1
-----------------	---

Provides the total number of DERP sites at the installation and the total number of sites in each program category (IRP and MMRP). The total number of sites that have achieved RC are also listed for the installation and by category (IRP and MMRP). Once a site has achieved RC, the environmental restoration is complete at the installation except for limited activity relating to long term management.

Lists the total number of acres at the installation impacted by environmental contamination.

DoD tracks site progress by environmental restoration phase (e.g., investigation, cleanup, long-term management) and demonstrates progress at these sites as they move from investigation through the cleanup phases to complete the environmental restoration requirements. This installation-level summary provides the total number of DERP sites at the installation and breaks that number down by DERP category (IRP or MMRP). It also shows the number of sites in each category that have achieved RC. Lastly, this section also lists the number of acres impacted by environmental contamination.

Defense Environmental Restoration Program (DERP) Issues

C Total Cost-to-Complete

Cost-to-Complete (\$K): \$17,318

Indicates the total cost-to-complete for the installation anticipated in FY2011 through completion. The total excludes program management and other support costs not attributable to specific sites.

This field provides the cost to complete (CTC) estimates for all remaining environmental actions at the installation. CTC estimates are the anticipated funds needed to complete cleanup at IRP sites and Munitions Response Sites (MRSs). DoD uses CTC estimates for several purposes, including planning, programming, budgeting and execution, as well as for reporting future program requirements. These amounts exclude program management and other support costs not directly attributable to specific sites.

Continued funding at sites that have achieved RC may be required to complete LTM actions specified in the site's decision document or requested by the lead regulatory agency. These costs are typically for activities such as conducting periodic monitoring and five-year reviews to ensure a site's cleanup actions have been protective of human health and the environment.

D Phase and Milestone Schedules

	Phase FY		Phase, Cost and Milestone Schedules by FY																											
Phase	Beg	End	<= 2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025=>												
PA	1990	2003	←																											
SI	1990	2007	←																											
RIFS	1990	2010	←																											
Study Completion		2010		•																										
IRA	1990	1995	←																											
RD	1996	2010	←																											
RA-C	1995	2011	←																											
Remedy in Place		2011		••																										
RA-O	1998	2015	←																											
Response Complete		2015						•••																						
LTM	2000	2020	←																											

Provides the beginning and end date by FY for each phase, and the FY for each milestone at the installation.

Cleanup activities often span multiple FY's, making it is necessary for DoD to track a cleanup action's status across multiple fiscal years. Phases within the investigation and cleanup stages may occur simultaneously or overlap across fiscal years.

On this section of the table, the phases and milestones of the cleanup process are identified along the y-axis, while the fiscal year start and end dates for the phases and milestones are on the x-axis. Anticipated milestones are highlighted according to the year in which they are expected to occur; those phases and milestones occurring prior to the FYs listed are shown with an arrow indicating the milestone has occurred in a previous year. These years may be estimated or actual years, depending on the phase and the installation's cleanup timeline. For both the phases and milestones, the start and end date are recorded in the Phase FY column.

Expected timelines for addressing DERP environmental cleanup are provided for the three major restoration milestones:

Defense Environmental Restoration Program (DERP) Issues

- ✓ Study Completion (SC) – MMRP or IRP sites where investigation of the environmental contamination is beginning or still underway
- ✓ RIP – The point at which the selected cleanup systems are constructed and operational
- ✓ RC – The point at which the site has achieved the agreed upon cleanup standards, indicating that cleanup is complete.

For each milestone, the end date is graphically depicted with one dot for the SC milestone, two dots for the RIP milestone, and three dots for the RC milestone.

E *Contaminant Type and Location*

Site Types: Burn Area, Contaminated Buildings, Contaminated Fill, Surface Disposal Area, Leach Field, Industrial Discharge, Incinerator, Landfill, Maintenance Yard, Pistol Range, Pesticide Shop, Storage Area, Small Arms Range, Spill Site Area, Sewage Treatment Plant, Above Ground Storage Tank, Underground Tank Farm, Underground Storage Tanks
Affected Media: Groundwater, Soil
Remedies: Drainage Controls, Removal, Waste Removal - Soils, Ground Water Treatment, Bioremediation - In Situ Groundwater, Dual-Phase Extraction, Free Product Recovery, Air Sparging, Carbon Adsorption, Natural Attenuation, Bioremediation - In Situ, Soil Vapor Treatment, Other, In Situ Soil Treatment, Waste Removal - Solids (non-soil)
Contaminants: BTEX, Halogenated VOCs, Metals

Describes each type of DERP site, the affected media, the remedies put in place to address the contamination, and the types of contaminants at the installation.

Data provided in this section identifies the various types of known environmental remediation issues found at the installation to be addressed under the DERP, as well as contaminants identified and the media affected. If remedies have been selected for the various cleanup actions, they are also included in this section. In some instances an installation may use a combination of remedies to address a contaminant within a specific medium, or the same remedy type may be applied to various site types.

Appendix II

Non-Defense Environmental Restoration Program (DERP) Issues

Appendix 2

Non-DERP Environmental Remediation Issues

This appendix provides details of known environmental remediation issues at installations affected by BRAC 2005 actions that are not included in the Defense Environmental Remediation Program (DERP). Currently, 9 Army and 6 Air Force installations have environmental remediation issues that are not included in DERP. For each installation that has non-DERP remediation issues a description of those issues is provided that includes the type of remediation issue; its description; acreage affected; an estimate of the cost-to-complete; a description of the plans to address each issue; and timelines for addressing each remediation issue in terms of estimated start and completion dates. (Note: For certain types of issues “acreage affected” is not relevant and therefore identified as “NA”).

The types of non-DERP environmental remediation issues included are as follows:

Operational Ranges: For operational ranges at installations subject to the BRAC 05 decisions, the Departmental may need to undertake appropriate remediation actions consistent with the proposed use of the area. An operational range is defined as a range under the jurisdiction, custody, or control of the Secretary of a military department, that is a designated land or water area set aside, managed, and used to conduct research on, develop, test, and evaluate military munitions and explosives, other ordnance, or weapon systems, or to train military personnel in their use and handling.

Asbestos: Includes both friable and nonfriable asbestos-related cleanup.

Landfill Closure: Equipment expected to be installed and facilities expected to be constructed (based on the landfill closure plan) near or after the time that the landfill stops accepting additional waste, as well as the costs of the initial cover (capping) to be applied when the landfill stops accepting additional waste. Landfill closures are operated under the provisions of Resource Conservation and Recovery Act (RCRA).

Tank Closure: RCRA corrective actions associated with contamination produced by above or below ground storage tanks and/or activities associated with a “clean close” of a tank.

Building DECON: Actions associated with the decontamination of any building or other permanent or temporary structure.

Radiological DECON: Includes actions for the decommissioning and decontamination of any location for radiological materials subject to regulation by the NRC or the Atomic Energy Act of 1954.

Permits to Site Closeouts: Includes actions associated with the closure and post-closure care of waste treatment, storage, or disposal facilities (TSDFs).

Notice of Violation: Includes actions associated with all unresolved Notices of Violation (e.g., Publicly Owned Treatment Works (POTW) and water discharges pursuant to National Pollution Discharge Elimination Systems (NPDES) permits).

Other: Includes any other form of environmental cleanup not addressed in other categories.

Appendix III

Section 2907 Law

Appendix 3

Defense Base Closure and Realignment Act of 1990, Public Law 101-510, as Amended

SEC. 2907. REPORTS

As part of the budget request for fiscal year 2007 and for each fiscal year thereafter for the Department of Defense, the Secretary shall transmit to the congressional defense committees of Congress:

- (1) a schedule of the closure actions to be carried out under this part in the fiscal year for which the request is made and an estimate of the total expenditures required and cost savings to be achieved by each such closure and of the time period in which these savings are to be achieved in each case, together with the Secretary's assessment of the environmental effects of such actions;
- (2) a description of the military installations, including those under construction and those planned for construction, to which functions are to be transferred as a result of such closures, together with the Secretary's assessment of the environmental effects of such transfers;
- (3) a description of the closure actions already carried out at each military installation since the date of the installation's approval for closure under this part and the current status of the closure of the installation, including whether —
 - (A) a redevelopment authority has been recognized by the Secretary for the installation;
 - (B) the screening of property at the installation for other Federal use has been completed; and
 - (C) a redevelopment plan has been agreed to by the redevelopment authority for the installation;
- (4) a description of redevelopment plans for military installations approved for closure under this part, the quantity of property remaining to be disposed of at each installation as part of its closure, and the quantity of property already disposed of at each installation;
- (5) a list of the Federal agencies that have requested property during the screening process for each military installation approved for closure under this part, including the date of transfer or anticipated transfer of the property to such agencies, the acreage involved in such transfers, and an explanation for any delays in such transfers;
- (6) a list of known environmental remediation issues at each military installation approved for closure under this part, including the acreage affected by these issues, an estimate of the cost to complete such environmental remediation, and the plans (and timelines) to address such environmental remediation; and
- (7) an estimate of the date for the completion of all closure actions at each military installation approved for closure under this part.
